14.4 EQUATING AND SCALING

The question paper of AIPGMEE comprises of 300 multiple choice questions each with four options and only one correct response. Multiple question papers are used for AIPGMEE for different sessions and days.

- A standard psychometrically-sound approach is employed for the scoring process of AIPGMEE. This approach has been applied to score all large scale Computer Based Examination utilizing multiple question papers.
- While all papers (forms) are carefully assembled to ensure that the content is comparable, the difficulty of each form may be perceived by different subjects undertaking the exam to slightly vary. Such minor differences in the overall difficulty level are accurately measured after all the different question papers (forms) have been administered and the results analyzed.

  A post-equating process is necessary to ensure validity and fairness. Equating is a psychometric process to adjust differences in difficulty so that performance from different exam papers (forms) are comparable on a common metric and therefore fair to candidates testing across multiple papers (forms).
- During post-equating, exam items are concurrently analyzed and the estimated item parameters (item difficulty and discrimination) are put onto a common metric. Item Response Theory (IRT), a psychometrically supported statistical model, is utilized in this process. The result is a score that takes into account the performance of the candidate along with the difficulty of the form administered.
- In order to ensure appropriate interpretation of performance, the scores must be placed on a common scale or metric. A linear transformation is used for this scaling process, which is a standard practice for such test administration.

  Post equating takes into account any statistical differences in examination difficulty and ensures all candidates are evaluated on a common scale. The aforesaid steps ensure that all examination scores are valid, equitable and fair. Merit List shall be prepared on the basis of scores obtained by the candidates.
- There is no provision for re-checking /re-totaling /re-evaluation of the question paper, answers, score and no query in this regard will be entertained.

14.5. Tie Breaker Criteria

In case of two or more candidates obtaining equal marks in the competitive entrance examination, their inter se merit will be determined according to age, older will get preference over younger.

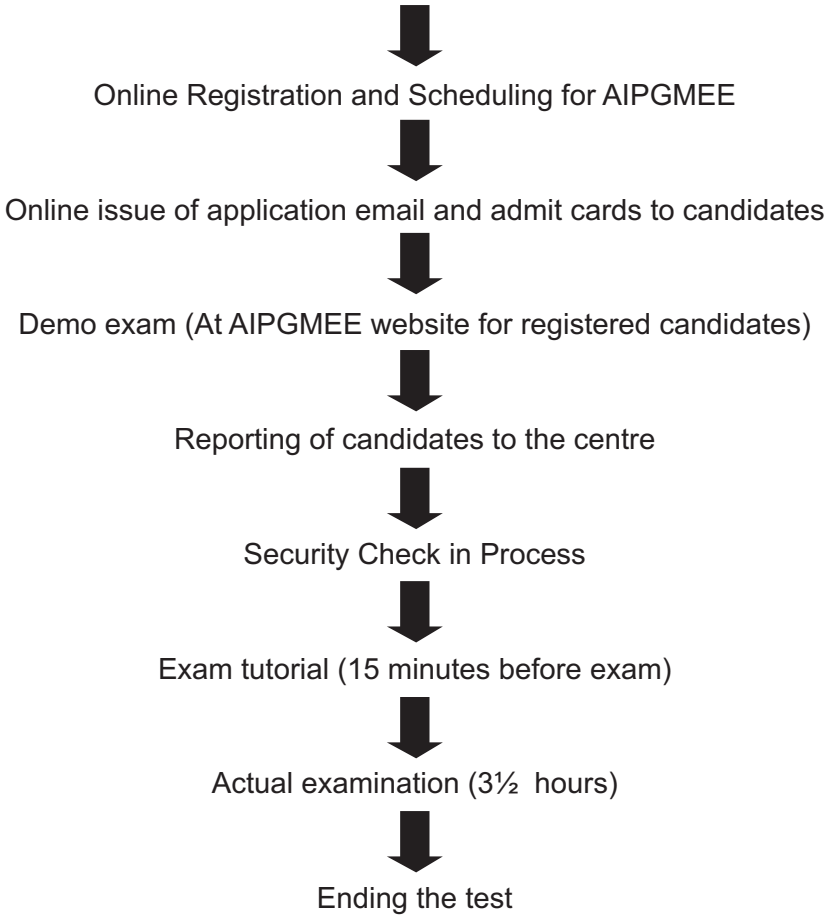
16. OVERVIEW OF COMPUTER BASED TESTING



17. FREQUENTLY ASKED QUESTIONS

Format of AIPGMEE

1. Is there a new testing format for AIPGMEE?

Yes, starting from the November 2013 administration, the All India Post Graduate Medical Entrance Examination has changed from a paper and pencil test to a computer-based test (CBT). This is not an Internet-based test, i.e. a candidate does not take the test over the Internet. Instead of reading the questions from a paper booklet and darkening the ovals in an answer sheet, a candidate will now read the questions on a computer screen and choose an answer by using a mouse to click on the appropriate option.

2. How is the computer-based format different from the paper and pencil format?

The only difference is in the way the questions are presented, and how responses are recorded.

3. What does a computer-based test look like?

A Demo exam will be made available on the AIPGMEE website **www.nbe.gov.in/ AIPGMEE** to provide candidates with the look and feel, as well as functionality of the actual test.

4. Can I take the exam from any computer?

No, a candidate will have to test take the exam on a pre-assigned workstation, in the testing venue chosen by him/her during the time of registration.

Exam Duration & Pattern

1. What is the duration of the exam?

The exam duration is 3 hours and 30 Minutes and will be conducted in a single section. There will also be an additional 15-minute tutorial prior to the start of the exam. Candidates will also need to accept a non-disclosure agreement (NDA) before beginning the exam.

2. How many questions will there be?

There will be a total of 300 questions.

3. Can I move back and forth between the questions?

Yes, candidates will have the option to navigate between the questions via the Review Screen. Candidates are advised to make use of the Demo exam on the AIPGMEE website **www.nbe.gov.in/AIPGMEE** to familiarise themselves with the navigation and functionality of the actual exam. A 15-minute tutorial will also be available prior to the start of the actual exam.

4. What type of questions will there be?

The exam will only contain multiple choice questions, each with four (4) options and only one (1) correct response.

5. What is the syllabus / course on which the exam would be based?

The exam will include all subjects taught during the MBBS course including pre-clinical, para-clinical and clinical. Approximate weight age will be given to each subject as indicated in the bulletin.

6. What is the 15-minute tutorial?

The tutorial provides a series of screens that will orient you to the computer based AIPGMEE. This will give you an opportunity to try the various features, including how to navigate between questions, review them, select, de-select, change and mark responses etc. The tutorial has a total duration of 15 minutes and candidates are advised to go through it entirely before starting the actual test. At the end of the tutorial, candidates will be asked to accept a non-disclosure agreement (NDA) before beginning the test. For a similar preview, candidates can take a tour of the Demo exam which will be available on AIPGMEE website at **www.nbe.gov.in/AIPGMEE**

7. What is the Demo Exam?

The Demo exam is a sample computer-based exam that is intended to familiarise candidates with the navigation and functionality of the AIPGMEE. It includes a tutorial on using the various features of the exam like moving between screens, selecting, de-selecting, marking and reviewing responses etc., as well as some sample questions which will allow candidates to try out these features. Note that these sample questions are not representative of the content of difficulty level of the actual exam.
